PREFACE TO THE FIRST EDITION

Acronyms and abbreviations are used extensively in medicine, science and technology for good reason—they are more essential in such fields. It would be difficult to imagine how one could write down chemical and mathematical formulas and equations without using abbreviations or symbols. In medicine, they are used as a convenient shorthand in writing medical records, instructions, and prescriptions, and as space-saving devices in printed literature. It is easier and more economical to write down the acronyms HETE and RAAS than their full names 12-L-hydroxy-5,8,10,14-eicosatetraenoic acid and renin-angiotensin-aldosterone system, respectively.

The main reason for abbreviations is said to be economy. Some actually save space in print, such as acronyms for the names of institutions and organizational units, as well as being convenient to use. Many are used for other reasons, as for instance, when trying to be delicate, we may euphemistically refer to bowel movement as BM, an unprinicipled individual as SOB, and body odor as BO. Also, it is sometimes difficult to fathom the reasoning of bureaucratic acronym makers, who have created some tongue-twisting monstrosities, such as ADCOMSUBORDCOMPHIBSPAC (for Administrative Command, Amphibious Forces, Pacific Fleet, Subordinate Command).

Abbreviations and acronyms used in medicine can be grouped into two broad categories. The first consists of official abbreviations and symbols used in chemistry, mathematics, and other sciences, and those designating weights and measures, whose exact form, capitalization, and punctuation have been determined by official governing bodies. In this category, they mean only one thing (e.g., kg is the symbol for kilogram and Hz for hertz), and their form, capitalization, and punctuation have been established by the International System of Units (Systeme International d'Unites). Abbreviations in the second group, on the other hand, may appear in a variety of forms, the same abbreviation having a different number of letters, sometimes capitalized, at other times not, with or without punctuation. Moreover, they may also have numerous meanings. The abbreviation AP may mean alkaline phosphatase, acid phosphatase, action potential, angina pectoris, and many other things.

Editors of individual scientific publications make an effort to standardize the form of abbreviations and symbols in their journals and books, but they generally vary from one publication to another.

This dictionary lists acronyms and abbreviations occurring with a reasonable frequency in the medical literature that were identified by a systematic scanning of collections of books and periodicals at the National Library of Medicine. Except as they take the form of Greek letters, pure geometric symbols are not included. Although we have attempted to be as inclusive as possible, a book such as this one can never be complete, in spite of the most diligent effort, and it is expected that some abbreviations and acronyms may have escaped detection and others may have been introduced since completion of the manuscript.

PREFACE TO THE FIFTH EDITION

In the four years since the publication of the fourth edition of the *Dictionary of Medical Acronyms & Abbreviations*, the coining of acronyms has continued at its usual furious pace, and the work of sifting through the enormous volume of candidates for inclusion remains a challenging task. This new fifth edition, although compiled with constant reference to its purpose as a convenient source for the most commonly used acronyms and abbreviations, has nonetheless grown by about 12,000 new entries.

Some long-time users of the book may notice that the familiar Hanley & Belfus imprint has been replaced by Elsevier's Saunders imprint. No matter what the imprint, however, the same care as always has been taken in the selection of entries and the verification of their accuracy. The familiar format of boldface acronyms and abbreviations followed by run-in meanings has been retained, allowing the book to be kept to a convenient size. New terms have been drawn especially from the areas of virology, clinical trials, new technology, and medical informatics. An important enhancement, not visible in this volume but important for the maintenance of the text in the future, is the addition of the contents to the database that houses the well-known *Dorland's Illustrated Medical Dictionary*, so that the same resources that help to make *Dorland's* the world's leading medical dictionary can be used for the *Dictionary of Medical Acronyms & Abbreviations*.

It is an unfortunate fact that the use of abbreviations, although a helpful time-saver, occasionally leads to ambiguity in interpretation. In some cases, especially in handwritten notes, this ambiguity rises to the level of causing serious concern for patient safety, and for this reason the Joint Commission on Accreditation of Healthcare Organizations (JCAHO) has created a list of abbreviations that are considered dangerous and should not be used in a healthcare setting. The abbreviations included in this edition have been compared with JCAHO's "Do not use" list, and those that occur on the list are so identified.

Even as this fifth edition is being prepared for publication, new acronyms and abbreviations are being added to the already existing body, so that no compilation can ever be complete. I invite you to submit your own suggestions for the next edition; this can be done over the Internet at *http://www.dorlands.com*; just click on the link "Suggest a Word." Be sure that in doing so you will have performed a great service to the ranks of grateful users (not to mention the grateful author and publisher) of the *Dictionary of Medical Acronyms & Abbreviations!*

ACKNOWLEDGMENTS

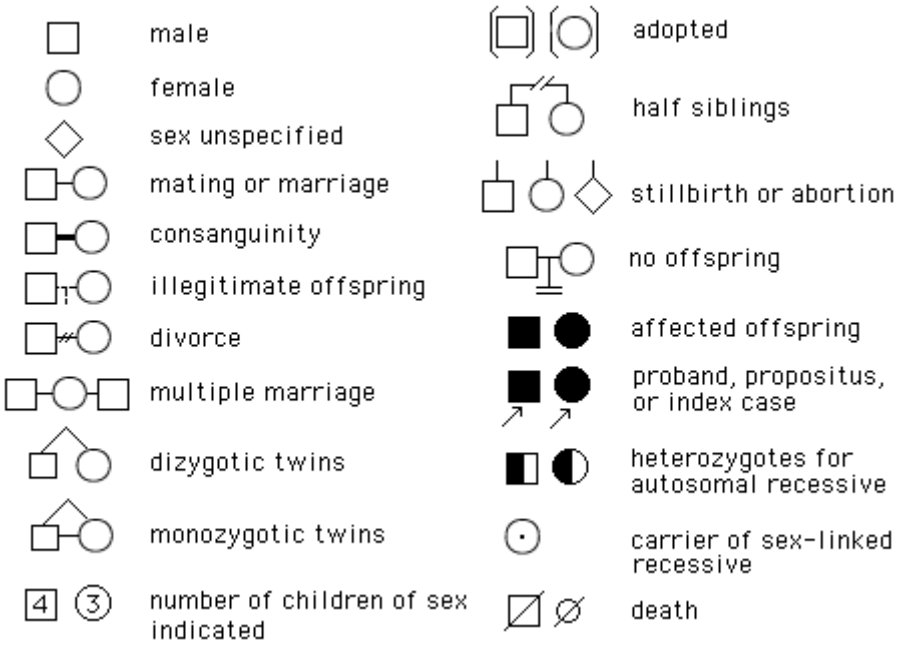

The author would like to thank Christopher Peterson, MD, PhD, of Rio de Janeiro, Brazil, for his continuing interest in the book and for supplying several hundred new entries for this edition. The work of Tsung O. Cheng, MD, of Washington, DC, was extremely useful for verifying acronyms for cardiology trials and is gratefully acknowledged: Cheng TO: Acronyms of clinical trials in cardiology—1998. American Heart Journal 137:726-765, 1999.

LLZ-TB lower lung zone tuberculosis

LM labiomental; lactic acid mineral [medium]; lactose malabsorption; laminin; laryngeal mask; laryngeal melanosis; laryngeal muscle; lateral malleolus; left main [coronary artery]; left marginal [coronary artery]; left median; legal medicine; lemniscus medialis; leptomeningeal; Levenberg-Marquardt [algorithm]; Licentiate in Medicine; Licentiate in Midwifery; light microscope, light microscopy; light minimum; lincomycin; lingual margin; linguomesial; lipid mobilization; liquid membrane; *Listeria monocytogenes*; living male; localized movement; longitudinal muscle; lower motor [neuron]; lung metastases; lymphatic metastases

L/M Latin male

Lm *Listeria monocytogenes*

Lm lower midline; lumen

L/m liters per minute

LMA laryngeal mask airway; left main [coronary] artery; left mentoanterior [fetal position]; limbic midbrain area; liver cell membrane autoantibody

LMB Laurence-Moon-Biedl [syndrome]; left main bronchus; leiomyoblastoma; leukomethylene blue

LMBB Laurence-Moon-Bardet-Biedl [syndrome]

LMBS Laurence-Moon-Biedl syndrome

LMC large motile cell; lateral motor column; left main coronary [artery]; left middle cerebral [artery]; living male child; lymphocyte-mediated cytotoxicity; lymphomyeloid complex

LMCA left main coronary artery; left middle cerebral artery

LMCAD left main coronary artery disease

LMCAO left marginal coronary artery occlusion

LMCC Licentiate of the Medical Council of Canada

LMCL left midclavicular line

LMD lipid-moiety modified derivative; local medical doctor; low-molecular-weight dextran; lumbar microdiscotomy

LMDS locally multiply damaged sites

LMDX low-molecular-weight dextran

LME left mediolateral episiotomy; leukocyte migration enhancement; longitudinal mixed effects [in linear regression analysis]

LMed&Ch Licentiate in Medicine and Surgery

LMF left middle finger; lymphocyte mitogenic factor

Lm/ft^2 lumens per square foot

LMG lethal midline granuloma

LMH lipid-mobilizing hormone

Lmh lumen hour

LMI leukocyte migration inhibition

LMIF leukocyte migration inhibition factor

L/min liters per minute

LMK low molecular weight kininogen

LML large and medium lymphocytes; left mediolateral; left middle lobe

LMM *Lactobacillus* maintenance medium; laser microbeam microdissection; lentigo maligna melanoma; light meromyosin

Lm/m^2 lumens per square meter

LMMG low molecular mass G [protein]

LMMH low molecular mass heparin

LMN lower motor neuron

LMNL lower motor neuron lesion

LMO living modified organism; localized molecular orbital

LMP large multifunctional protease; last menstrual period; latent membrane potential; left mentoposterior [fetal position]; lumbar puncture

LMPS lethal multiple pterygium syndrome

LMR left medial rectus [muscle]; localized magnetic resonance; longitudinal medical record; lymphocytic meningopolyradiculitis

LMRCP Licentiate in Midwifery of the Royal College of Physicians

LMRP local medical review policy

LMS laser marker system; lateral medullary syndrome; least mean square; left main stem [coronary artery]; leiomyosarcoma; Licentiate in Medicine and Surgery

Lms lumen-second

LMS HPF least means square high pass filter

LMSSA Licentiate in Medicine and Surgery of the Society of Apothecaries

LMT left main trunk; left mentotransverse [fetal position]; leukocyte migration technique

LMV larva migrans visceralis

LMW low molecular weight

Lm/W lumens per watt

LMWD low-molecular-weight dextran

LMWH low-molecular-weight heparin

LMWP low-molecular-weight proteinuria

LMWT low molecular weight

LMZ left midzone

LN labionasal; laminin; Lesch-Nyhan [syndrome]; lipoid nephrosis; Lisch nodule; low necrosis; lung nodule; lupus nephritis; lymph node; Lyon normotensive [rat]

Ln lymph node

LN_2 liquid nitrogen

L/N letter/numerical [system]

Ln natural logarithm

LNAA large neutral amino acid

LNBx lymph node biopsy

LNC lymph node cell

LND lymph node dissection

LNDS lymph node [cancer] negative dataset

LNE lymph node enlargement

LNF laparoscopic Nissen fundoplication

LNH large number hypothesis

LNKS low natural killer syndrome

LNL lymph node lymphocyte

LNLS linear-nonlinear least squares

LNM lymph node metastasis

LNMC lymph node mononuclear cell

LNMP last normal menstrual period

LNNB Luria-Nebraska Neuropsychological Battery

LNP large neuronal polypeptide

LNPF lymph node permeability factor

LNS lateral nuclear stratum; Lesch-Nyhan syndrome

LNV last normal vertebra

LO lateral oblique; linguo-occlusal; lipoxygenase; lumbar orthosis; lysyl oxidase

5-LO 5-lipooxygenase

LOA leave of absence; Leber optic atrophy; left occipitoanterior [fetal position]

LOAEL lowest observed adverse effect level

LOC laxative of choice; level of consciousness; liquid organic compound; locus of control; loss of consciousness

LOCA low osmolarity contrast agent

Lo cal low calorie

Lo calc low calcium

LOCAT Lopid Coronary Angiography Trial

LOCF last observation carried forward

Lo CHO low carbohydrate

Lo chol low cholesterol

LOCM low molecular contrast medium

LOCS laryngoonychocutaneous syndrome

LOD line of duty; log odds ratio [score]

LOF lofexidine

LOFD low outlet forceps delivery

LOG lipoxygenase

LOG, LoG laplacian of gaussian [in imaging]

Log logarithm

LOGIC laryngeal and ocular granulations in children of Indian subcontinent [syndrome]

LOH loop of Henle; loss of heterozygosity

LOHF late-onset hepatic failure

LOI level of incompetence; level of injury; limit of impurities; loss of imprinting

LOIH left oblique inguinal hernia

LOINC Logical Observation Identifier of Names and Codes [vocabulary]

Lo k low potassium

LOKD late-onset Krabbe disease

LOKV Lokern virus

LOL left occipitolateral [fetal position]

LOM left otitis media; ligament of Marshall; limitation of motion; loss of motion

LOMC laser optical memory card

LOMIR-MCT-IL Lomir [isradipine] Multicenter Study in Israel

LOMSA left otitis media suppurativa acuta

LOMSC, LOMSCh left otitis media suppurativa chronica

Lo Na low sodium

Long longitudinal

LONIR Laboratory of Neuro-Imaging Resources

LOP leave on pass; left occipitoposterior [fetal position]

LOPAIR long path infrared [alarm]

LOPP chlorambucil, vincristine, procarbazine, prednisolone

LOPS length of patient's stay

LOQ lower outer quadrant

LOR long open reading frame; lorazepam; loricrin; loss of righting reflex

Lord lordosis, lordotic

LORETA low-resolution brain electromagnetic tomography

LORF long open reading frame

LOS length of stay; Licentiate in Obstetrical Science; lipo-oligosaccharide; low cardiac output syndrome; lower [o]esophageal sphincter

LOS(P) lower [o]esophageal sphincter (pressure)

LOT lateral olfactory tract; left occipitotransverse [fetal position]; Long-Term Outcome after Thrombolysis [study]

Lot lotion

LOV large opaque vesicle; loviride

LOWBI low-birth-weight infant

LOX liquid oxygen; lysyl oxidase

LOXL lysyl oxidase-like

LP labile peptide; labile protein; laboratory procedure; lactic peroxidase; lamina propria; laryngopharyngeal; late potential; latent period, latency period; lateralis posterior [muscle]; lateral plantar; lateral posterior; lateral pylorus; latex particle; *Legionella pneumophila*; leukocyte poor; leukocytic pyrogen; levator palati; levator palpebrae; lichen planus; ligamentum patellae; light padding; light perception; lingua plicata; linear predictive [spectral analysis]; linear programming; linguopulpal; lipoprotein; liver plasma [concentration]; longitudinal propagation; loss of privileges; low potency; low power; low pressure; low protein; lumbar puncture; lumboperitoneal; lung parenchyma; lymphocyte predominant; lymphoid plasma; lymphomatoid papulosis

L/P lactate/pyruvate [ratio]; liver plasma [concentration]; lymph/plasma [ratio]

Lp lipoprotein; sound pressure level

$\mathbf{L_p}$ pathlength

LPA latex particle agglutination; left pulmonary artery; lipoprotein A; lysophosphatidic acid

Lp(a) lipoprotein A

LPAM L-phenylalanine mustard

LPB, Lp(b) lipoprotein B

LPBP low-profile bioprosthesis

LPC laser photocoagulation; late positive component; leukocyte-poor cell; linear predictive coding; lipocortin; longitudinal primary care [program]; lysophosphatidylcholine

LPCh latero-posterior choroidal

LPCM low-placed conus medullaris

LP/cm line pairs per centimeter

LPCT late proximal cortical tubule

LPD Lovelace Patient Database; low-protein diet; luteal phase defect; lymphoproliferative disease

LPDF lipoprotein-deficient fraction

LPDS lymph node [cancer] positive dataset

LPE lipoprotein electrophoresis; liquid phase epitaxy; lysophosphatidylethanolamine

LPF leukocytosis-promoting factor; leukopenia factor; lipopolysaccharide factor; localized plaque formation; low pass filter; low-power field; lymphocytosis-promoting factor

Lpf low-power field

LPFB left posterior fascicular block

LPFN low-pass filtered noise

LPFS low-pass filtered signal

LPG left paracolic gutter; lipophosphoglycan

LPH lactase-phlorizin hydrolase; left posterior hemiblock; lipotropic pituitary hormone

LPHA local public health agency

LPHAS limb/pelvis-hypoplasia/aplasia syndrome

LPHD lymphocyte-predominant Hodgkin disease

LPI left posterior-inferior; lysinuric protein intolerance

LPIFB left posteroinferior fascicular block

LPIH left posteroinferior hemiblock

LPK liver pyruvate kinase

LPL lethal-potentially-lethal; lichen planus-like lesion; lipoprotein lipase; local probability of lesion

LPLA lipoprotein lipase activity

LPM lateral pterygoid muscle; leverage and parallelepiped mechanism [computer-assisted surgery]; liver plasma membrane

Lpm lines per minute; liters per minute

Lp/mm line pairs per millimeter

LPN Licensed Practical Nurse

LPO lactoperoxidase; left posterior oblique; light perception only; lipid peroxidation

LPP large plaque parapsoriasis; lateral pterygoid plate

LPPH late postpartum hemorrhage

LPR lactate-pyruvate ratio; late phase reaction

Lpro longitudinal prospective [trial]

LPS lateral premotor system; levator palpebrae superioris [muscle]; linear profile scan; link power status; lipase; lipopolysaccharide; Lovastatin Pravastatin Study

Lps liters per second

LPSR lipopolysaccharide receptor

LPT Language Proficiency Test; lipotropin

LPTP Laboratory Proficiency Test Program [Canada]

LPV lapine parvovirus; left portal view; left pulmonary veins; lopinavir

LPVP left posterior ventricular preexcitation

LPW lateral pharyngeal wall

Lpw lumens per watt

LPX, Lp-X lipoprotein-X

LPyV lymphotropic polyomavirus

LQ linear quadratic; longevity quotient; lordosis quotient; lower quadrant

LQS Lexicon Query Service Specifications

LQT long QT [syndrome]

LQTS long QT syndrome

LR labeled release; laboratory references; laboratory report; labor room; lactated Ringer's [solution]; large reticulocyte; latency reaction; latency relaxation; lateral rectus [muscle]; lateral retinaculum; left hand; left-handed [person]; left rotation; level of recommendation; level of risk; light reaction; light reflex; likelihood ratio; limb reduction [defect]; limit of reaction; livedo reticularis; local recurrence; logistic regression; low renin; lymphocyte recruitment

L-R left to right

L/R left-to-right [ratio]

LR[+] positive likelihood ratio

LR[-] negative likelihood ratio

L&R left and right

Lr lawrencium; limes reacting dose [the least amount of toxin which will produce a reaction]

$\mathbf{L_r}$ limes reacting dose [the least amount of toxin which will produce a reaction]

LRA local relevance aggregation [algorithm for insulin therapy]; low right atrium

LRC learning resource center; lipid research clinic; lower rib cage

LRC-CDPT Lipid Research Clinics Coronary Drug Project Trial

LRC-CPPT Lipid Research Clinics Coronary Primary Prevention Trial

LRCMB Laboratory of Retinal Cell and Molecular Biology

LRC-MFS Lipid Research Clinics Mortality Follow-Up Study

LRCP Licentiate of the Royal College of Physicians; low-risk chest pain

LRCS Licentiate of the Royal College of Surgeons

LRCSE Licentiate of the Royal College of Surgeons, Edinburgh

LRD living related donor

LRDT living related donor transplant

LRE lamina rara externa; leukemic reticuloendotheliosis; lymphoreticuloendothelial

LREC language resources and evaluation

LREH low renin essential hypertension

LRES long-range evaluation system

LRes limited resuscitation

Lretro longitudinal retrospective [trial]

LRF latex and resorcinol formaldehyde; liver residue factor; luteinizing hormone-releasing factor

LRG leucine-rich glycoprotein

LRH likelihood ratio for heterogeneity; luteinizing hormone-releasing hormone

LRI lamina rara interna; lower respiratory [tract] illness; lower respiratory [tract] infection; lymphocyte reactivity index

LRL lower [heart] rate limit

LRLT living-related donor transplantation

LRM left radical mastectomy; logistic regression model

LRMP last regular menstrual period

LRN Laboratory Response Network; lateral reticular nucleus

LROP lower radicular obstetrical paralysis

LRP lichen ruber planus; linear resolution pattern; lipoprotein receptor-related protein; long-range planning

LRPC Long Range Planning Committee [National Cancer Institute]

Lr-PET low resolution positron emission tomography

LRQ lower right quadrant

LRR labyrinthine righting reflex; leucine-rich repeat; light reflection rheography; local regional recurrence; lymph return rate

LRS laboratory results; lactated Ringer solution; lateral recess stenosis; lateral recess syndrome; low rate of stimulation; lumboradicular syndrome

LRSDS long range standoff detection system

LRSF lactating rat serum factor; liver regenerating serum factor

LRSS late respiratory systemic syndrome

LRT lateral reticular nucleus; living related transplant; local radiation therapy; long terminal repeat; Lovastatin Restenosis Trial; lower respiratory tract

LRTI lower respiratory tract illness; lower respiratory tract infection

LRV Lato River virus; left renal vein; *Leishmania* RNA virus

LS lateral septum; lateral suspensor; leader sequence; learning system; least; left sacrum; left septum; left side; legally separated; Leigh syndrome; leiomyosarcoma; length of stay; Leriche syndrome; Letterer-Siwe [disease]; Licentiate in Surgery; life sciences; light scanning; light scattering [technique]; light-sensitive, light sensitivity; light sensor; light sleep; Likert score; liminal sensation; linear scanning; linear scleroderma; lipid synthesis; liver and spleen; long sleep; longitudinal section; longitudinal study; Lowe syndrome; low-sodium [diet]; lower strength; lumbar spine; lumbosacral; lung surfactant; lymphosarcoma

L-S Letterer-Siwe [disease]; lipid-saccharide

L:S lecithin:sphingomyelin [ratio]

L/S lactase/sucrase [ratio]; lecithin/ sphingomyelin [ratio]; lipid/saccharide [ratio]; longitudinal section; lumbosacral

L&S liver and spleen

LSA left sacro-anterior [fetal position]; left subclavian artery; leukocyte-specific activity; lichen sclerosus et atrophicus; lymphosarcoma

LS&A lichen sclerosus et atrophicus

LSAH Longitudinal Study of Astronaut Health

LSANA leukocyte-specific antinuclear antibody

LSA/RCS lymphosarcoma-reticulum cell sarcoma

LSB least significant bit; left sternal border; left scapular border; long spike burst; lower sternal border; lumbar sympathetic block

LSBE low-segment Barrett's esophagus

LS-BMD lumbar spine bone mineral density

LSC last sexual contact; late systolic click; least significant change; left side colon cancer; left subclavian; lichen simplex chronicus; liquid scintillation counting; liquid-solid chromatography; locus subcoeruleus

LSc local scleroderma

LScA left scapulo-anterior [fetal position]

LSCL lymphosarcoma cell leukemia

LSCM laser scanning confocal microscopy

LScP left scapulo-posterior [fetal position]

LSCS lower segment cesarean section

LSCT lung cancer screening test

LSCVP left subclavian central venous pressure

LSD laryngeal sound discrimination; least significant difference; least significant digit; low-sodium diet; lysergic acid diethylamide

LSD-25 lysergic acid diethylamide

LSDIS large scale distributed information system

LSE least squares error; left sternal edge

LSect longitudinal section

LSEP left somatosensory evoked potential; lumbosacral somatosensory evoked potential

LSER linear solvation energy relationship

LSF linear spread function; low saturated fat; lymphocyte-stimulating factor

LSFB least squares forward backward

LSG labial salivary gland; losigamone

LSGP leukocyte sialoglycoprotein

LSH lutein-stimulating hormone; lymphocyte-stimulating hormone

LSHTM London School of Hygiene and Tropical Medicine

LSI large-scale integration; latent semantic indexing; life satisfaction index; List of Serials Indexed [NLM]; lumbar spine index

LSIL low-grade intraepithelial lesion

LSK liver, spleen, kidneys

LSKM liver-spleen-kidney-megaly

LSL left sacrolateral [fetal position]; left short leg; lymphosarcoma [cell] leukemia

LSM laser scanning microscopy; late systolic murmur; least square mean; least square matching [algorithm]; lymphocyte separation medium; lysergic acid morpholide

LSN large scale networking; left substantia nigra

LSNWG Large Scale Networking Working Group

LSO lateral superior olive; left salpingo-oophorectomy; left superior oblique; lumbosacral orthosis

LSP left sacroposterior [fetal position]; linguistic string project; liver-specific protein; lymphocyte-specific protein

LSp life span

LS PACS low-speed picture archive and communication system

L-Spar asparaginase (Elspar)

LSP-MLP linguistic string project-medical language processor

LSPV left superior pulmonary vein

LSR lanthanide shift reagent; lecithin/ sphingomyelin ratio; left superior rectus [muscle]; liver/spleen ratio

LSRA low septal right atrium

LSRO Life Sciences Research Office

LSS latest starting shift; Life Span Study; life support station; liver-spleen scan; lumbar spinal stenosis; lumbosacral spine

LSSA lipid-soluble secondary antioxidant

LS-SEDUHS Longitudinal Study on Socio-Economic Differences in Utilization of Health Services

LS-SEHD Longitudinal Study on Socio-Economic Health Differences

LSSP-PCR low-stringency single specific primer polymerase chain reaction

LST lateral spinothalamic tract; lateral spreading tumor; left sacrotransverse [fetal position]; life-sustaining treatment

LSTAT life support for trauma and transport

LSTL laparoscopic tubal ligation

LSU lactose-saccharose-urea [agar]; life support unit

LSV lateral sacral vein; left subclavian vein; lesser saphenous vein; Lone Star virus; longitudinal sound velocity

LSVC left superior vena cava

LSVT large scale vocabulary test; left saphenous vein thrombophlebitis

LSWA large amplitude slow wave activity

LT heat-labile toxin; laboratory technology/technologist; laminar tomography; Laplace transform; left; left thigh; left thoracic; less than; lethal time; leukotriene; Levin tube; levothyroxine; light; line termination; long-term; low temperature; lumbar traction; lymphocytic thyroiditis; lymphocytotoxin; lymphotoxin; syphilis [lues] test

L-T3 L-triiodothyronine

L-T4 L-thyroxine

Lt left; light; low tension

LTA leukotriene A; lipoate transacetylase; lipotechoic acid; local tracheal anesthesia; long-term archives; lost-time accident

L-TAP Lipid Treatment Assessment Project

LTAS lead tetra-acetate Schiff

LTB larparoscopic tubal banding; laryngotracheobronchitis; leukotriene B

LTBI latent tuberculosis infection

LTC large transformed cell; leukotriene C; lidocaine tissue concentration; long-term care; lysed tumor cell

L1TC level 1 trauma center

LTCF long-term care facility

LTCIC, LTC-IC long-term culture-initiating cell

LTCS low transverse cervical section

LTD Laron-type dwarfism; laterodorsal tegmental [nucleus]; leukotriene D; long-term [cortical] depression; long-term disability

LTE laryngotracheoesophageal; leukotriene E

LT-ECG long-term electrocardiography

LTF lactotransferrin; lateral tegmental field; lipotropic factor; lymphocyte-transforming factor

LTFU lost to follow-up

LTG lamotrigine; long-term goal; low-tension glaucoma

LTH lactogenic hormone; local tumor hyperthermia; low temperature holding; luteotropic hormone

LTI lupus-type inclusions

LTK laser thermokeratoplasty; leukocyte tyrosine kinase

Lt lat left lateral

LTLT low-temperature, long-time [pasteurization]

LTM long-term memory

LTN lateral telangiectatic nevus

LTNP long-term non-progressor

LTO_2 long-term oxygen therapy

LTOT long-term oxygen therapy

LTP laryngotracheoplasty; lateral thigh perforator; Learning Technologies Project; leukocyte thromboplastin; lipid transfer protein; long-term potentiation; L-tryptophan

LTPA leisure-time physical activity

LTPP lipothiamide pyrophosphate

LTR laryngotracheal reconstruction; location transactivating region; long terminal repeat

LTRA leukotriene receptor antagonist; long-term repopulating ability

LTS laboratory tests; least trimmed squares [method]; long-term survival; long-term survivor

LTST low-temperature stabilization technology

LTT lactose tolerance test; leucine tolerance test; limited treadmill test; lymphocyte transformation test

LTV lung thermal volume

LTW Leydig-cell tumor in Wistar rat

LTX liver transplantation

LU left upper [limb]; loudness unit; Lupron; lytic unit

Lu lutetium

L&U lower and upper

LUC large unstained cell; luciferase

LUCL lateral ulnar collateral ligament

LUE left upper extremity

LUF lesion underdose factor [radiosurgery]; luteinized unruptured follicle

LUFS luteinized unruptured follicle syndrome

LUKV Lukuni virus

LUL left upper eyelid; left upper limb; left upper lobe; left upper lung

Lumb lumbar

LUMD lowest usual maintenance dose

LUMO lowest unoccupied molecular orbital

LUMPS liver unit management protocol system

LUO left ureteral orifice

LUOQ left upper outer quadrant

LUP left ureteropelvic; low urethral pressure

LUPV left upper pulmonary vein

LUQ left upper quadrant

LURD living unrelated donor

LUS laparoscopic ultrasound; lower uterine segment

LUSB left upper scapular border; left upper sternal border

LUT look-up table

LUTO lower urinary tract obstruction

LUV large unilamellar vesicle

LUZ left upper zone

LV laryngeal vestibule; latent virus; lateral ventricle; lecithovitellin; left ventricle, left ventricular; Lentivirus, lentivirus; leucovorin; leukemia virus; leukosis virus; live vaccine; live virus; low voltage; low volume; lumbar vertebra; lung volume; lyssavirus

Lv brightness or luminance

Lv leave

LVA left ventricular aneurysm; left vertebral artery

LVAD left ventricular assist device

LV_{ap} apical aspect of left ventricle

L-variant a defective bacterial variant that can multiply on hypertonic medium

LVAS left ventricular assist system

LV_{bas} lateral basilar left ventricle

LVBP left ventricular bypass pump

LVC low-viscosity cement

LVCS low vertical cesarean section

LVD left ventricular dysfunction

LVd latent viroid; left ventricle, distal [electrode]

LVDD left ventricular diastolic dimension

LVDd left ventricular diastolic dimension; left ventricular dimension in end-diastole

LVDI left ventricular dimension

LVDP left ventricular developed pressure; left ventricular diastolic pressure

LVDT linear variable differential transformer

LVDV left ventricular diastolic volume

LVE left ventricular ejection; left ventricular enlargement

LVED left ventricular end-diastole

LVEDA left ventricular end-diastolic area

LVEDC left ventricular end-diastolic circumference

LVEDD left ventricular end-diastolic diameter; left ventricular end-diastolic dimension

LVEDI left ventricular end-diastolic volume index

LVEDP left ventricular end-diastolic pressure

LVEDV left ventricular end-diastolic volume

LVEF left ventricular ejection fraction

LVEJT left ventricular ejection time

LVEP left ventricular end-diastolic pressure

LVESD left ventricular end-systolic dimension

LVESV left ventricular end-systolic volume

LVESVI left ventricular end-systolic volume index

LVET left ventricular ejection time; low volume eye test

LVETI left ventricular ejection time index

LVF left ventricular failure; left ventricular function; left visual field; low-voltage fast; low-voltage foci

LVFP left ventricular filling pressure

$LVFT_2$ left ventricular slow filling time

LVFW left ventricular free wall

LVG left ventriculogram

LVH large vessel hematocrit; left ventricular hypertrophy

LVI left ventricular insufficiency; left ventricular ischemia

LVID left ventricular internal dimension

LVIDd left ventricle internal dimension in diastole

$LVID_d$ left ventricle internal dimension in end-diastole

LVIDs left ventricle internal dimension in systole

$LVID_s$ left ventricle internal dimension in end-systole

LVIV left ventricular inflow volume

LVL left vastus lateralis

LVLG left ventrolateral gluteal

LVM left ventricular mass; left ventricular mass index

LVMF left ventricular minute flow

LV_{mid} midanterior left ventricle

LVN Laguerre-Volterra network [artificial neural network]; lateral ventricular nerve; lateral vestibular nucleus; Licensed Visiting Nurse; Licensed Vocational Nurse

LVO left ventricle outflow

LVOH left ventricle outflow [tract] height

LVOT left ventricular outflow tract

LVOTG left ventricular outflow tract gradient

LVOTO left ventricular outflow tract obstruction

LVOV left ventricular outflow volume

LVP large volume parenteral [infusion]; left ventricular pressure; levator veli palatini; lysine-vasopressin

LVp left ventricle, proximal [electrode]

LVPFR left ventricular peak filling rate

LVP_{max} maximum left ventricular pressure

LVP_{min} minimum left ventricular pressure

LVPW left ventricular posterior wall

LVQ learning vector quantization

LVR loviride

LVRD left ventricular replacement device

LVRS lung volume reduction surgery

LVS laryngovideostroboscopy; left ventricular strain; live vaccine strain

LVs left ventricular system

LVSEMI left ventricular subendocardial myocardial ischemia

LVSI left ventricular systolic index

LVSO left ventricular systolic output

LV-SO left ventricular site of origin

LVSP left ventricular systolic pressure

LVST lateral vestibulospinal tract

LVSV left ventricular stroke volume

LVSW left ventricular stroke work

LVSWI left ventricular stroke work index

LVT left ventricular tension; levetiracetam; lysine vasotonin

LVV left ventricular volume; Le Veen valve; live varicella vaccine; live varicella virus

LVW left ventricular wall; left ventricular work

LVWI left ventricular work index

LVWM left ventricular wall motion

LVWT left ventricular wall thickness

LW lacerating wound; lateral wall; Lee-White [method]

L&W, L/W living and well

Lw lawrencium

LWA low weight for age

LWBS leaving [hospital] without being seen

LWCT Lee-White clotting time

LWK large white kidney

LWP lateral wall pressure

LWS Lowry-Wood syndrome
